

Looking for a “Hard to Find” Item for Your Liquefied Natural Gas (LNG) Project?

INDUSTRIAL SUPPLY AND RENTAL PROVIDED BECHTEL ENGINEERING WITH OFF-THE-SHELF ITEMS ON TIME & UNDER BUDGET

Bechtel Engineering is one of the most respected global engineering, construction, and project management companies. Their Cheniere LNG project in Cameron, LA required a very specific type of pipe cap that is not commonly kept in stock—requiring them to be specially ordered. But time was an issue, so that left our team with two options.

INDUSTRIAL SUPPLY AND RENTAL’S SOLUTION

The team at Industrial Supply and Rental faced Bechtel Engineering’s request head on. We knew there were two options to consider. The first option was to purchase a \$13,000 flange—but this option required three weeks lead time for it to be custom made. The second option was to custom make the caps for \$9,000—with a **six day turnaround time**.

It was a clear consensus, the latter option was the best choice. Industrial Supply and Rental was able to help Bechtel Engineering make the most cost-effective and time-efficient decision, allowing them to get on with their project.

SPECIALTY REQUESTS FULFILLED BY INDUSTRIAL SUPPLY AND RENTAL

At Industrial Supply and Rental, we take pride in being able to provide our customers with hard to find, quick lead time items. We supply industries that install, replace, and repair pipe installations, including construction, refineries, oil fields, liquefied natural gas facilities, pipeline construction firms, and maritime vessels. When your project requires industrial equipment that you can’t commonly find, we’re the company to know. You’re making the right choice when you choose our team for your project supply needs in Texas and Louisiana—we ship nationwide!
